

The ultra-thin anti-vibration turntable sheet made by butyl rubber w/stroboscope & overhung gauge

## BR-ONE

At its sensational appearance in 2010, Oyaide "MJ-12" turntable sheet attracted audiophile's attention by its beautiful figure. Then we have started to produce its option item which enhances the performance of MJ-12. A result of development will appear on the market as BR-ONE.

BR-ONE, made by butyl rubber, is the 1mm thick turntable sheet.

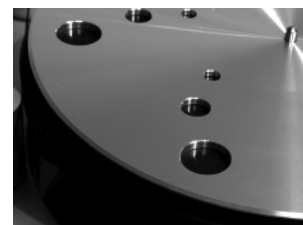

Its excellent vibration damping property absorbs vibration generated on the platter and maximizes the property of MJ-12. The simple usage of BR-ONE is that you just place it between turntable platter and MJ-12. It will also have good result combining with your other turntable sheets .

As a turntable sheet directly placed on the platter

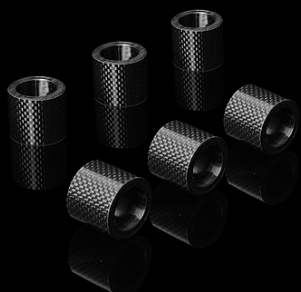

w/ stroboscope and overhang gauge

Enhance its performance w/ MJ-12

### BR-ONE

- Material Butyl rubber
- Thickness 1mm
- Weight 80g
- Attachments Stroboscope (33/45/78 RPM、50/60Hz、PP coated paper、Printing on the package)  
Overhang gauge (measurement range 5~30mm)

### The multi-use carbon pipe

#### STB-CM-6

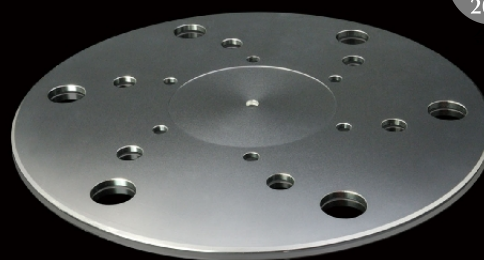

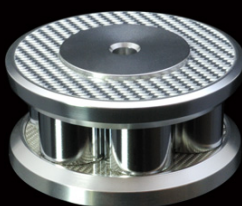

- Material CFRP(Carbon UD + Carbon cloth)
- Size Outer Diameter φ20、Inner Diameter φ14、Thickness 3mm、height 17mm (pipe shape)
- Weight 4g /piece

※This product can be used as weight for STB-MS.

### The heavyweight vinyl stabilizers

#### STB-MS

- Material A5052 Aluminum cut by NC machining  
Silver carbon (surface & bottom)  
Chrome plated pure brass (Weight×6・Axis×1)
- Dimensions φ70mm H35mm
- Weight 200g (without weights) ~ 440g (with weights)

### The original turntable sheet of the new analog generation.

#### MJ-12

- Material A5052 Alminum cut by NC machining、Almite finished
- Size Diameter 294mm、thickest part 5mm
- Weight 670g
